CLAIMS AMENDED UNDER PCT ARTICLE 34

The following amendments were made during the international phase of this application.

1. Claims 1 and 10 to 13 were amended as follows:

1. (amended) A radioprotective material which provides protection from at least one member selected from the group consisting of X-rays, gamma rays and electron beams, the radioprotective material comprising at least one member selected from the group consisting of collagens, keratins, silk fibroins and their derivatives.

10. (amended) Use of at least one member selected from the group consisting of collagens, keratins, silk fibroins and their derivatives as a radioprotective material which provides protection from at least one member selected from the group consisting of X-rays, gamma rays and electron beams.

11. (amended) Use of at least one member selected from the group consisting of collagens, keratins, silk fibroins and their derivatives for the production of a radioprotective material which provides protection from at least one member selected from the group consisting of X-rays, gamma rays and electron beams.

12. (amended) Use of at least one member selected from the group consisting of collagens, keratins, silk fibroins and their derivatives for the production of a radioprotective product which provides protection from at least one member selected from the group consisting of X-rays, gamma rays and electron beams.

13. (amended) A method for blocking or reducing the adverse effects of at least one type of radiation selected from the group consisting of X-rays, gamma rays and electron beams, the method comprising protecting a subject with a radioprotective material according to claim 1.

2. **Claims 3 and 4 were deleted.**
